Subject: Additional manufacturing sources for passive products.

Dear Valued Customer,

MACOM Technology Solutions has a goal of providing redundant manufacturing capability for increased surge capacity as well as an uninterrupted supply chain.

In order to expand capacity and meet our commitment to customers, we are planning to introduce an additional source for assembly and test for passive parts in addition to the existing sources in Vietnam. The new source is located in Koh Kong, Cambodia, which has been approved by MACOM through the new product introduction procedure and the new supplier introduction procedure with the onsite audit completed. Samples will be ready in early of June if required.

There will be no change in form, fit or function, as well as datasheet specs. Raw materials will also be the same, which will be provided from MACOM's approved existing suppliers.

The part numbers affected are:

- **MABA-009210-CT1760**
- **MABA-011085**
- **MACP-011029**

In accordance with MACOM Technology Solutions' customer notification policy, you are receiving this notice because you have purchased one or more of the products listed in the previous two-year period.

Please contact your local sales representative if you have any specific questions.

Sincerely,

Aidan Mulcahy
Product Marketing Manager
